

OTTIMO

Unique design and high technology

Silence and design: you will want it to be seen but not heard.

With its Inverter technology, its design and its vertical air discharge, OTTIMO is a compact and discreet heat pump, perfect for tight spaces.

FEATURES AND BENEFITS

• SIMPLE AND INTUITIVE OPERATION

Color digital touch screen.

Three operating modes:

Heating, Cooling and Automatic.

• OPTIMAL PERFORMANCES

- Titanium exchanger in a PVC housing, efficient and corrosion resistant.

• LOW NOISE LEVEL

Noise reduction insulation on all panels (ABS Panels).

- Inverter compressor, higher COP thanks to the variable speed motor.

• ENERGY EFFICIENCY

- Full-Inverter Technology,
- Low impact R32 refrigerant,
- Enhanced COP.

INVERTER

- A DC brushless variable speed ventilator to ensure optimal performances.

• INTELLIGENT OPERATING MODE

The heat pump autoregulates its output depending on the air temperature.

• CONNECTED SOLUTION

Wifi included.

Compatible with the remote management solutions: Polyconnect PRO and LITE.

OUR TECHNOLOGY

• EXCLUSIVE REGULATION

- Optimization of the power required for maintaining the temperature of the pool by cross-referencing air temperature with water temperature data.
- Anticipation of the pool's energy needs thanks to an advanced double-entry regulation.
- An overall higher COP during the season and lower noise levels.

• INVERTER TECHNOLOGY AND ENERGY SAVINGS

- Inverter compressor with «oversized» exchangers = **higher COP**.
- Brushless variable speed fan = **lower noise levels**
- Combination of the Inverter compressor and the Brushless fan motor = **automatic regulation of the power** of Master-Inverter **when the pool does not require full power**.

• 3 OPERATING MODES

Boost Mode: the heat pump will raise its heating capacity to near full capacity in order to heat the pool water rapidly.

Smart Mode: the output and the noise levels are automatically optimized taking into account the air and the water temperature

ECO-SILENT Mode: the maximum power output is limited in order to prioritize noise over heating power.

HIGHER COP

=

LOWER electricity bills

LOWER noise levels

=

BETTER user comfort

** Tests run with air temperature of 15°C, water inlet temperature of 26°C and water outlet temperature of 28°C in order to define the required water flow, heating capacity and consumption. In accordance with FPP recommendations (French Pool Federation).

COLOR TOUCH SCREEN

A LARGE HIGHLY RESPONSIVE COLOR TOUCH SCREEN

- High capacitive TFT touch screen with a 480x480 resolution IPS panel
- Protected by a layer of thermal toughened glass to ensure maximal resistance
- Large size for good readability: L 72 x H 68 mm, 4" diagonal (over 10.5 cm)

>> The mounting box with its transparent protective door protects the display from climatic conditions, dust and scratches. The screen and internal components are protected from damage.

INTUITIVE USER INTERFACE

THE MULTILINGUAL CONTROL INTERFACE INCLUDES NEW FEATURES for clear operations and intuitive navigation.

Access the 3 intuitive operating modes in a single gesture!

View all information simultaneously

Clock settings, timers and display parameters...

Wifi included = simple connected solution

Alarm messages, diagnostics and problem resolutions, hotline contact

Access to the last 50 log-book events

REMOTE CONTROL

Control remotely of all the parameters via the free app for smartphone or tablet for a connected and simple management!
