Google Play

Pairing and initialization of the application

#Step 1: open the Wi-Fi settings of the smart phone

Step 2: connect the smart phone to the Wi-Fi of the heat pump "PAC Inverter"

#Step 3: connect the heat pump to the home's Wi-Fi using the page that will open when the smartphone connects to the heat pump.

Important: if the Wifi signal from your home is very weak, then you should improve the signal near the heat pump to pair it with the app.

Step 4: when the heat pump is connected to the same Wi-Fi network as the smart phone (home Wi-Fi network), the Wi-Fi LED lights up in green

#Step 5: open the application

#Step 6: create a new account

A registration form for the POLYCONNECT application. It has a white background with a blue header. The form contains four input fields: 'Login', 'Password', and 'Confirmation'. Below these is a dropdown menu for language selection, currently set to 'Français'. At the bottom is a blue button with the text 'S'ENREGISTRER' in white.

#Step 7: Confirm the email address by clicking on the link sent by email to the registration email address

#Step 8: press the "+ HEAT PUMP" button to pair your heat pump with the application

#Step 9: Enter the serial number of your HP or Scan the QR code located on the hatch of the electrical terminal or next to the heat pump Nameplate

#Step 10: name your heat pump.

#Step 11: fill in the details of your pool in the app.
